### **DETAILED ACTION**

Claims 49-66 are currently pending.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 49-56 drawn to a method of analyzing the relative binding affinities of ligands, classified in class 436, subclass 518.
- II. Claims 57-66, drawn to a method of determining the presence of a ligand having a relatively high on-rate for a target, classified in class 436, subclass 501.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are drawn to different patentably distinct methods. The methods are different and patentably distinct because they use different steps, may require different reagents, have different method objectives and will produce different products and/or results. They therefore have different issues regarding patentability and enablement and represent patentably distinct subject matter.

Because these inventions are distinct for the reasons given above and:

- a. have acquired a separate status in the art as shown by their different classification;
- b. the search required for Group I is not required for Group II and each group requires different and separately burdensome manual/computer bibliographic searches in patent and literature databases; and

c. have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
